## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of the species of figures 1, 2, 8, and 9 in the reply filed on 12/18/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-7, 13, and 15 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,733,513. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively broad subject matter claimed in the instant application such as a balloon consisting essentially of at least one metal and

further, the method of vacuum depositing metal film onto the cylindrical mandrel to form the balloon which would have been obvious in view of the relatively detailed subject matter of the patent claims.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Euteneuer (U.S. 5,499,980).

Euteneuer discloses the claimed invention in figures 1-4, an inflatable balloon (14) consisting essentially of at least one metal (col. 5, lines 48-54) and the metal balloon is being selected from at least one of the group as recited in the claimed; wherein the balloon (14) has a wall thickness between about 3um and 10um; furthermore, the method comprising the steps of vacuum depositing of the at least one metal onto the generally cylindrical mandrel to form the inflatable balloon and removing the mandrel from the inflatable balloon.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishida (U.S. 5,879,369) discloses a catheter balloon forming metal layer.
